

Nannette Benedict DDS & Associates

Welcome to the office of Dr. Benedict & Associates!

We appreciate the time you took to call our office. Our philosophy is based on quality of life dentistry and a comfortable high level of care for you and your family. Our goal is to preserve your natural teeth for life, maintain your oral health, and enhance your smile.

Our wish is to provide for your complete dental health needs. We strive to make the initial visit pleasant and informative by performing a complete dental examination, evaluating not only your teeth but the health and condition of your supporting gum and bone tissues. If x-rays are necessary, please take comfort in knowing we use safer digital x-rays that require 80% to 90% less radiation exposure than traditional x-rays. With the use of our intra-oral camera we can provide a more comprehensive examination using the latest diagnostic technology.

From this comprehensive examination, we can establish the priorities of therapy, give you the estimated costs, and provide you with a complete treatment plan. This offers you the best opportunity to better partner with us in maintaining your oral health.

For our patients who are apprehensive about dental treatment, we do offer nitrous oxide (“laughing gas”) for a small fee. Please let us know if there is anything we can do to make your dental visits easier.

Additionally, our office offers:

- CEREC crowns that can be completed in one appointment, saving you valuable time
- Endodontic & periodontal specialists, providing root canal therapy and implants
- Invisalign, the alternative to conventional braces.
- Laser services, for periodontal conditions and soft tissue lesions

For your convenience, we also have a website where you can request appointments or pay online,

www.scottsvalleydentist.com

We look forward to seeing you at your next visit to our office!
